Skills

Technical Skills

C++

Writing programs using STL and Boost with recent language standards

C

Linux interface programming and developing high performance services

Python

Advanced scripting, prototyping, and automating with unit tests

x86_64 Assembly

Writing processor specific high performance procedures and data vectorization

Bash

Advanced scripting, prototyping and automating in Linux systems

Linux Administration

Configuring, automating, administering and securing Linux systems

Qt, QML

Developing full-featured cross-platform graphical user interfaces

OpenCV

Developing image and video processing applications

OpenGL, GLSL

3D graphics programming and developing game engines

PostgreSQL, MySQL, MongoDB

Designing, developing and administering relational and non-relational databases

Tools

Git

Using source control professionally along many of development workflows

Docker, Kubernetes

Dockerizing and shipping projects using advanced containerization techniques

GCC, GDB

Using compiling optimizations and debugging techniques

Sanitizers, Valgrind Suite

Using advanced profiling tools along development

Make, CMake Suite

Adapting projects to auto-compiling, testing, packaging and monitoring

Doxygen, Sphinx, UML, PlantUML

Writing precise documentations containing UML diagrams

Miscellaneous Skills

Vim

My default text editor for coding and configuring

LaTeX

Writing documents, including this resume
